

Computer Graphics through OpenGL: Experiments and Theory

Sumanta Guha
Asian Institute of Technology

NOTICE: This is a draft version meant for limited circulation only. Feel free to circulate privately, use as a reference, in class, and such. Do *not* put either the soft copy or a printed version where it may be accessed publicly. E.g., do not put any part of the book up on a website. If you have a question about fair use please mail the author at guha@ait.ac.th.

CODE: Code for the book is available for download at the site <http://www.cs.ait.ac.th/~guha/CGOET>.

FEEDBACK: The author welcomes comments and suggestions for improvement, particularly so they might be incorporated into the final version. Please mail to guha@ait.ac.th. Of course, if you are reviewing for the publisher then respond only to them.

Preface

Contents

1	On to OpenGL	1
1.1	First Program	2
1.2	Orthographic Projection, Viewing Box & World Co-ordinates	4
1.3	The OpenGL Window and Screen Co-ordinates	10
1.4	Clipping	10
1.5	Color, OpenGL State Machine and Interpolation	12
1.6	OpenGL Program Structure	15
1.7	OpenGL Geometric Primitives	17
1.8	Approximating Curved Objects	26
1.9	Three Dimensions, the Depth Buffer and Perspective Projection	27
1.9.1	A Vital 3D Utility: The Depth Buffer	28
1.10	Drawing Projects	35
1.11	Approximating Curved Objects Once More	37
1.12	Vertex Arrays	40
1.13	Truly 3-Dimensional OpenGL	43
1.14	Summary, Notes and More Reading	44
2	Convexity and Interpolation	47
2.1	Motivation	47
2.2	Convex Combinations and Interpolation	49
2.3	Convexity and the Convex Hull	58
2.4	Summary, Notes and More Reading	67
3	Triangulation	69
3.1	Definition and Motivation	69
3.2	Steiner Vertices and the Quality of a Triangulation	72
3.3	Triangulation by OpenGL and the Trouble with Non-Convexity	73
3.4	OpenGL Tessellation	78
3.5	Summary, Notes and More Reading	79

4	Orientation	81
4.1	Motivation	81
4.2	OpenGL Procedure to Determine Front and Back Faces	83
4.3	Consistently Oriented Triangulation	87
4.4	Culling Obscured Faces	94
4.5	Summary, Notes and More Reading	95
5	An OpenGL Toolbox	97
5.1	Display Lists	98
5.2	Drawing Text	99
5.3	Programming Mouse Buttons	100
5.4	Programming non-ASCII Keys	102
5.5	Menus	102
5.6	Line Stipples	103
5.7	GLUT Objects	105
5.8	Clipping Planes	105
5.9	gluPerspective()	109
5.10	Viewports	112
5.11	Multiple Windows	113
5.12	Summary, Notes and More Reading	113
6	Transformation, Animation and Viewing	115
6.1	Modeling Transformations	116
6.1.1	Translation	116
6.1.2	Scaling	118
6.1.3	Rotation	120
6.2	Composing Modeling Transformations	124
6.3	Placing Multiple Objects	130
6.4	Modelview Matrix Stack and Isolating Transformations	137
6.5	Animation	141
6.5.1	Animation Technicals	141
6.5.2	Animation Code	142
6.6	Viewing Transformation	153
6.6.1	Understanding the Viewing Transformation	153
6.6.2	Simulating a Viewing Transformation with Modeling Transformations	163
6.6.3	Orientation and Euler Angles	170
6.7	Viewing Transformation and Collision Detection in Animation	172
6.8	More Collision Detection	175
6.9	More Animation Code	180
6.9.1	Animating an Articulated Figure	180
6.9.2	Simple Shadow Animation	185
6.10	Selection and Picking	186
6.10.1	Selection	187

6.10.2	Picking	191
6.11	Summary, Notes and More Reading	193
7	Linear Algebra Pocket Reference	195
7.1	Matrix Operations	195
7.2	Determinants	199
7.3	Matrix Inverses	203
7.4	Vectors	205
7.5	Linear Transformations	209
7.6	Affine Transformations	214
7.7	Affine Transformations and OpenGL	216
7.8	Affine Transformations and Homogeneous Co-ordinates	218
7.9	Summary, Notes and More Reading	220
8	Inside Animation: Mathematics of Transformations	223
8.1	Geometric Transformations in 2-Space	224
8.1.1	Translation	224
8.1.2	Scaling	225
8.1.3	Rotation	226
8.1.4	Reflection	227
8.1.5	Affine Geometric Transformations	229
8.1.6	Euclidean and Rigid Transformations	233
8.1.7	Shear	241
8.2	Geometric Transformations in 3-Space	244
8.2.1	Translation	244
8.2.2	Scaling	245
8.2.3	Rotation	246
8.2.4	Reflection	258
8.2.5	Affine Geometric Transformation	260
8.2.6	Accessing and Manipulating the Current Modelview Matrix	261
8.2.7	Euclidean and Rigid Transformation	264
8.2.8	Shear	270
8.3	Summary, Notes and More Reading	272
9	Advanced Animation Techniques	273
9.1	Frustum Culling by Space Partitioning	273
9.1.1	Space Partitioning	275
9.1.2	Quadtrees	275
9.1.3	Implementation	278
9.1.4	More about Space Partitioning	279
9.2	Animating Orientation Using Euler Angles	280
9.2.1	Euler Angles and the Orientation of a Rigid Body	280
9.2.2	Animating Orientation	281

9.2.3	Problems with Euler Angles: Gimbal Lock and Ambiguity	282
9.3	Quaternions	285
9.3.1	Quaternion Math 101	285
9.3.2	Quaternions and Orientation	288
9.4	Summary, Notes and More Reading	298
10	Drawing in 3D Space	299
10.1	Curves	300
10.1.1	Specifying Plane Curves	300
10.1.2	Specifying Space Curves	304
10.1.3	Drawing Curves	307
10.1.4	Polynomial and Rational Parametrizations	310
10.1.5	Conic Sections	312
10.1.6	Curves More Formally	313
10.2	Surfaces	321
10.2.1	Polygons	321
10.2.2	Meshes	322
10.2.3	Planar Surfaces	324
10.2.4	General Surfaces	324
10.2.5	Drawing General Surfaces	325
10.2.6	Swept Surfaces	330
10.2.7	Ruled Surfaces	339
10.2.8	Quadric Surfaces	342
10.2.9	GLU Quadric Objects	346
10.2.10	Regular Polyhedra	347
10.2.11	Surfaces More Formally	354
10.3	Bézier Phrase Book	360
10.3.1	Curves	361
10.3.2	Surfaces	364
10.4	Fractals	369
10.5	Summary, Notes and More Reading	372
11	Color and Light	375
11.1	Vision and Color Models	376
11.1.1	RGB Color Model	377
11.1.2	CMY and CMYK Color Models	379
11.1.3	HSV (or HSB) Color Model	380
11.1.4	Summary of the Models	382
11.2	Phong's Lighting Model	383
11.2.1	Phong Basics	383
11.2.2	Specifying Light and Material Values	385
11.2.3	Calculating the Reflected Light	386
11.2.4	First Lighting Equation	392

11.3	OpenGL Lighting and Material Color	394
11.3.1	Light Properties	394
11.3.2	Material Properties	395
11.3.3	Experimenting with Properties	396
11.3.4	Color Material Mode	398
11.4	OpenGL Lighting Model	400
11.5	Directional Lights, Positional Lights and Attenuation of Intensity	402
11.6	Spotlights	403
11.7	OpenGL Lighting Equation	405
11.8	OpenGL Shading Models	406
11.9	Animating Light	407
11.10	Normals	408
11.10.1	Transforming Normals	409
11.11	Partial Derivatives, Tangent Planes and Normal Vectors 101	411
11.12	Computing Normals and Lighting Surfaces	419
11.12.1	Polygons and Planar Surfaces	419
11.12.2	Meshes	420
11.12.3	General Surfaces	423
11.12.4	Bézier and Quadric Surfaces	426
11.12.5	Normalizing Normals	428
11.13	Phong's Shading Model	429
11.14	Summary, Notes and More Reading	431
12	Texture	433
12.1	Texture Basics and the Texture Map	433
12.2	Repeating and Clamping Textures	439
12.3	Filtering	441
12.4	Specifying Texture Co-ordinates	448
12.4.1	Parametrized Surfaces	448
12.4.2	Bézier and Quadric Surfaces	449
12.5	Lighting Textures	451
12.6	Summary, Notes and More Reading	453
13	Advanced Visual Techniques	455
13.1	Blending	455
13.1.1	How it Works	455
13.1.2	Opaque and Translucent Objects Together	459
13.1.3	Blending Textures	462
13.1.4	Creating Reflections	463
13.2	Fog	463
13.3	Billboarding	465
13.4	Antialiasing	466
13.5	Environment Mapping	468

13.5.1	Sphere Mapping	469
13.5.2	Cube Mapping	474
13.6	Stencil Buffer Techniques	475
13.6.1	OpenGL Buffers	475
13.6.2	Using the Stencil Buffer	477
13.7	Bump Mapping	480
13.8	Summary, Notes and More Reading	483
14	Raster Algorithms	485
14.1	Cohen-Sutherland Line Clipper	485
14.2	Sutherland-Hodgeman Polygon Clipper	490
14.3	Bresenham’s Line Rasterizer	493
14.4	Scan-Based Polygon Rasterizer	498
14.4.1	Algorithms	501
14.4.2	Optimizing using Edge Coherence – Active Edge List	504
14.5	Summary, Notes and More Reading	510
15	Bézier Curves and Surfaces	511
15.1	Bézier Curves	512
15.1.1	Linear Bézier Curves	512
15.1.2	Quadratic Bézier Curves	514
15.1.3	Cubic Bézier Curves	517
15.1.4	General Bézier Curves	518
15.2	Bézier Surfaces	525
15.3	Summary, Notes and More Reading	529
16	B-Spline Curves and Surfaces	531
16.1	Problems with Bézier Primitives: Motivating B-Splines	532
16.2	B-Spline Curves	535
16.2.1	First-order B-Splines	536
16.2.2	Linear B-Splines	538
16.2.3	Quadratic B-Splines	541
16.2.4	Cubic B-Splines	546
16.2.5	General B-Splines and Non-uniform Knot Vectors	548
16.3	B-Spline Surfaces	562
16.4	Drawing B-Spline Curves and Surfaces	564
16.4.1	B-Spline Curves	564
16.4.2	B-Spline Surfaces	565
16.4.3	Lighting and Texturing a B-Spline Surface	566
16.4.4	Trimmed B-Spline Surface	567
16.5	Summary, Notes and More Reading	570

17 Hermite Interpolation	571
17.1 Hermite Splines	571
17.2 Natural Cubic Splines	576
17.3 Cardinal Splines	578
17.4 Hermite Surface Patches	579
17.5 Summary, Notes and More Reading	581
18 Projective Spaces and Transformations	583
18.1 Motivation and Definition of the Projective Plane	584
18.2 Geometry on the Projective Plane and Point-Line Duality	587
18.3 Homogeneous Co-ordinates	588
18.4 Structure of the Projective Plane	590
18.4.1 Embedding the Real Plane in the Projective Plane	590
18.4.2 A Thought Experiment	590
18.4.3 Regular Points and Points at Infinity	592
18.5 Snapshot Transformations	594
18.6 Homogeneous Polynomial Equations	599
18.6.1 More about Point-Line Duality	601
18.6.2 Lifting an Algebraic Curve from the Real to the Projective Plane	602
18.6.3 Snapshot Transformations Algebraically	606
18.6.4 Conic Sections	607
18.7 Dimension of the Projective Plane and Generalization	608
18.8 Definition of a Projective Transformation	609
18.9 Projective Transformations Geometrically	611
18.10 Relating Projective, Snapshot and Affine Transformations	617
18.10.1 Snapshot Transformations via Projective Transformations	617
18.10.2 Affine Transformations via Projective Transformations	620
18.11 Designing a Projective Transformation to Specification	622
18.12 Summary, Notes and More Reading	628
19 Applications of Projective Spaces	631
19.1 A Unifying View of Translations, Rotations and Scalings	631
19.2 OpenGL Projection Transformations	633
19.2.1 Viewing Box to Canonical Viewing Box	635
19.2.2 Viewing Frustum to Canonical Viewing Box	637
19.2.3 Projection Matrix Stack	640
19.2.4 Perspective Shadows	641
19.3 Rational Bézier and NURBS Curves and Surfaces	642
19.3.1 Rational Bézier Curves Basics	643
19.3.2 Drawing Rational Bézier Curves	646
19.3.3 Rational Bézier Curves and Conic Sections	647
19.3.4 Some Properties of Rational Bézier Curves	648
19.3.5 Rational Bézier Curves and Projective Invariance	650

19.3.6	Rational Bézier Surfaces	654
19.3.7	The 'R' in NURBS	655
19.4	Summary, Notes and More Reading	656
20	Graphics Pipelines	657
20.1	Synthetic-Camera Pipeline	658
20.1.1	All Except Rasterization	658
20.1.2	Rasterization with Perspective Correction	662
20.1.3	1D Primitive Example	666
20.1.4	Exercises	669
20.2	BSP Trees	671
20.3	Ray Tracing Pipeline	678
20.3.1	Going Global: Shadows	680
20.3.2	Going Even More Global: Recursive Reflection and Transmission	682
20.4	Radiosity	687
20.4.1	Introduction	687
20.4.2	Basic Theory	689
20.4.3	Computing Form Factors	691
20.4.4	Solving the Radiosity Equation to Determine Patch Brightnesses	693
20.4.5	Implementing Radiosity	695
20.5	Summary, Notes and More Reading	696
A	Math Self-Test	707
B	Math Self-Test Solutions	713
C	Installing OpenGL and Running Code	721
